

how to fix which is mentioned in the image.

Those messages are just **Edge tracking-prevention warnings** about SweetAlert's CDN; they do not break your app and can usually be ignored.^{[1] [2]}

If you want to clean them up:

1) Why the warning appears

- You load SweetAlert2 from `https://cdn.jsdelivr.net/npm/sweetalert2@11/...`
- Edge's Tracking Prevention blocks 3rd-party storage (cookies/localStorage) for some CDNs and logs a warning like:
"Tracking Prevention blocked access to storage for `https://cdn.jsdelivr.net/...`"^{[3] [1]}
- SweetAlert2 still works because it does not rely on that storage.

2) Fix inside your project (no browser changes)

To avoid the warning without changing browser settings, serve SweetAlert **locally** instead of via CDN:

1. Install SweetAlert2 as a dependency:

```
npm install/sweetalert2
```

2. Copy the built files into your public folder (for a simple EJS app):

Create folders:

```
public/js/  
public/css/
```

Then, in your project root:

```
cp node_modules/sweetalert2/dist/sweetalert2.all.min.js public/js/  
cp node_modules/sweetalert2/dist/sweetalert2.min.css public/css/
```

3. In your EJS pages (login, signup, otp, forgot-password), replace the CDN tags:

```
<!-- OLD -->  
<script src="https://cdn.jsdelivr.net/npm/sweetalert2@11"></script>  
<link rel="stylesheet" href="https://cdn.jsdelivr.net/npm/sweetalert2@11/dist/sweetalert2.min.css">
```

```
<!-- NEW -->
<link rel="stylesheet" href="/css/sweetalert2.min.css">
<script src="/js/sweetalert2.all.min.js"></script>
```

Now SweetAlert is loaded from localhost, so Edge's tracking prevention will not complain. [\[4\]](#) [\[5\]](#)

3) Alternative: ignore for development

If everything works and you prefer not to copy files:

- You can safely ignore these warnings during development; they do not affect OTP, login, or other logic.
- They will still appear as orange warnings in the console but are not errors. [\[3\]](#)

So: your app is fine; switching SweetAlert to local files is the clean way to remove the warnings.
